Available. Immediate

Objective:

Frontend web developer with 4 years of experience in building web applications using React, Node, JavaScript. My experience includes working on multi-tenant applications, secure, microservices, Integration, management system, and SPAs.

Technical Skills:

Programming Language: Primary: JavaScript (ES5, ES6)

JS Frameworks: Node, react, angularjs(soft)

Architecture: Client-Server, REST, Monolithic, Microservices,

DevOps: Docker, CI (Continuous Integration) / CD (Continuous delivery) – (Jenkins), GitHub actions, Version Control: git, Build Tool: Maven, Gradle, NPM, Bower,

Testing: Unit Testing, Integration Testing, Jasmine, jest,

Other: HTML5, CSS3, CSS Modules, Bootstrap, SCSS, jQuery, Typescript, Methodologies: Agile, waterfall, IDE/Tools & OS: Eclipse, Visual studio code, IntelliJ Idea, Sublime, Linux, Window

Work History:

Expertflow (Pvt.) Ltd. Pakistan

Cisco ATP Partner for EMEAR region. Specialized in Cisco Enterprise and Express Contact Centre.

Frontend web developer (Aug 2019 – Sep 2022)

Relocated Managed teams at a granular level. Reported directly to the technical manager.

Main Responsibilities: Contributed to the development and integration of modules plugging proprietary CRM vendors with the CISCO contact center environment. Played an active role as a lead developer in the team and trained 4 junior team members. Managed small teams during the project. Involved in Day-2 Support services for various clients. Involved in understanding customer change requests, analyzing business requirements, planning developments, and conducting UATs with the customer.

Main Achievements: Successful applications advertised on the Cisco marketplace. Successfully deployed, managed, and supported applications on many customers like PITB, PTCL, Eagle Hills, MCB, GR Europe, etc. Successfully segregated applications on microservices-based architecture on both frontend and backend.

Professional Projects

Task Manager
Enables users to manage their daily tasks.
